

Introducing ZoxZone.hotel

Even though your guests may be traveling, they still need to check their email, connect to their corporate network for the latest presentation or search for a great restaurant. Staying connected is not longer a luxury, it's a necessity. Now it's possible to not only offer your guests this vital service, but to give them fast connections as well. Introducing ZoxZone.hotel, a completely new high speed Internet access system designed for hotel operators and their guests.

What is ZoxZone.hotel?

ZoxZone.hotel is an Internet management and billing solution that offers new revenue opportunities for your business and added value for your guests. Designed to provide your guests with high speed Internet access, ZoxZone.hotel provides broadband connection speeds to multiple customers through a single high speed Internet connection such as cable, DSL, satellite or ISDN. With ZoxZone.hotel, you can offer your guests an economical way to access to their e-mail, office networks or favorite Web sites even though they are away from their business or home. ZoxZone.hotel is a comprehensive system that manages access privileges, Internet connectivity and billing services.

ZoxZone.hotel Features and Benefits

- **Fast** - ZoxZone.hotel provides high speed Internet access to multiple guests simultaneously through a single broadband connection such as DSL, cable, ISDN, satellite or an existing T1 line. Through a unique bandwidth sharing system, ZoxZone.hotel provides connection speeds that will satisfy even the most discriminating and experienced computer user.
- **Flexible** - ZoxZone.hotel uses industry standard components and is easily integrated into your existing phone or network infrastructures. This allows you to choose which connectivity options are best suited to your current and future business needs.
- **Easy to Use** - ZoxZone.hotel makes it easy for your guests to get online quickly through an intuitive user interface that guides them through the log in process. Once online through the high speed connection you provide, your guests will have a enjoyable user experience that will bring them back on their future trips.
- **Secure** - ZoxZone.hotel provides user validation and account authentication to provide the highest levels of network security. SSL (Secure Socket Layer) encryption is used to protect sensitive information such as credit card numbers and account data.
- **Cost Effective** - With the addition of ZoxZone.hotel, you can economically provide a new product for your hotel properties that increases your revenue potential and value to your guests.
